

THRASHER

ARCHITECTURE | ENGINEERING | FIELD SERVICES

The Thrasher Group is the largest privately held architecture, planning, and engineering firm in the state of West Virginia. The firm has more than 35 years of experience in delivering professional and technical services to clients throughout the Mid-Atlantic region. Thrasher provides a full range of design, engineering, planning and construction phase services.

The firm's architectural design can be described as thoughtful and creative, taking into account client vision, function, and natural surroundings. Thrasher has LEED Accredited Professionals on staff, and incorporates a broadening spectrum of sustainable design strategies as part of our design approach. Green building practices greatly reduce the environmental impact of construction, and green design create more "livable" buildings with healthier, more productive environments, and lower maintenance and operating costs. Consideration of the Leadership in Energy and Environmental Design (LEED) philosophy is integral to our design and planning process.
